A new challenge: Upgrading your SAP R/3 System...

In the current increasingly competitive scenario, it has become imperative to keep your IT systems up-to-date and in pace with the changing business environment. The challenge to attain this goal demands a wide variety of skill-sets and a desire for continuous improvement.

And when it comes to maintaining and upgrading powerful enterprise software such as SAP, the selection of a solution partner becomes even more critical.

Upgrading SAP R/3 is more complex than ever. The technology differences between versions 3.x and 4.x make the upgrade much more than simply a technical project. Over a period of time, SAP has enhanced its products and standardised many functionalities that previously required customisation. NovaSoft knows that these technical and functional complexities require specialists. NovaSoft specialists understand and resolve technical issues faced during an upgrade as well as understand the new functional areas.

Do you want to know how to successfully plan and execute your SAP version upgrade from 3.x to 4.x with a minimum disruption to your day-to-day business?

- Do you know how the **“SAP Version Upgrade”** can benefit your business?
- What are the complexities involved in the **“Technical Migration and Functionality Enhancement”** of SAP 3.x to 4.x?
- Do you often think of giving your users the benefit of **“EnjoySAP”** User Interface”?
- In short, would you like to ask all these questions you have regarding the SAP Version Upgrade. Speak to the NovaSoft **“SAP Version Upgrade”** Specialist.

The answers to these questions will enable your Organisation to gain a more stable and reliable system. The end result of which, allows upgrades to the system to be implemented with more ease and speed, thus optimising the investment in your SAP ERP system. NovaSoft has the talent, knowledge, and most importantly experience in System Optimisation techniques.
